

## DBMANAGER

DBMANAGER: PC software designed for quickly compiling the databases of your scale

The screenshot shows the DBMANAGER software interface with a table of scale data. The table has columns for ID, Description 1, Description 2, Linked tare, Linked customer, Setpoint 1, Setpoint 2, and Setpoint 3. The data includes various fruits and vegetables like Apples, Pears, Tomatoes, Lettuces, Peaches, and Melons, each with specific setpoint values.

PC software which facilitates and speeds up the compiling of the scale's databases, with the possibility to import/export them in a Excel format.

The best solution  
for advanced industrial  
applications

## STRONG POINTS

- Easy to configure: in a few minutes you can program and transmit dozens of articles, keeping them even in memory.
- Security: you can set a protection password to protect your entries data and to prevent accidental changes.
- Customisation: you can insert your logo and translate the user interface directly in your own language (.ini file).
- Multi-scale: up to 10 scales can be configured from the same programme (attention: requires multi-scale licence, to be specified when ordering).
- Management of the main communication modes: RS232, USB, Ethernet-Wifi (TCP-IP).
